MIRROR GLOSS COLLECTION

To push the limits of depth and definition, color and reflective gloss, Kronospan asked its engineers to challenge the conventional conception of melamine facing. Analyzing the impact of dramatic changes to time, pressure, and heat, Kronospan engineers discovered that the key to perfecting the mirrored surface lays in an extended press time (more than 4x normal) with a gradual, liquid cooling of the surface (over 15 minutes in the press) prior to extraction. The new structure, called MG, required construction of an entirely new multi-daylight press, a tailored resin formula and a new process for impregnation representing one of the most extensive investments in a new product by Kronospan in more than a decade.

The new range consists of 20 durable, scratch resistant, light and colorfast decors that include 14 colors, 4 wood designs and 2 fantasy decors. The perfect application for the Mirror Gloss collection is fine domestic spaces, offices and luxury retails.

PRODUCT DESCRIPTION

Kronospan Mirror Gloss products are produced with first class particleboard or medium density fiberboard (MDF) and high quality melamine film for decorative use in the furniture industry and interior design.

CHARACTERISTICS

- Sparkling gloss
- Light and colorfast
- High durability and resilience
- High wear resistance and stability
- High chemical and thermal resistance
- Easy to clean
- Long-lasting

APPLICATIONS

- Interior design
- Home and office furnishings
- Retail and other shop fittings
- Kitchens
- Bathrooms

TEXTURE AND QUALITY

Substrate material:

Particleboard with fine sanded surface, formaldehyde emission class E-LE or Medium density fiberboard (MDF)

For further information, please refer to our technical data sheets.

Surface:

Either double sided with Mirror Gloss surface texture MG with protective foil or PE surface texture on the back side
