Red Grandis & Grandis Oak Coating System

A great Oak look at a fraction of the cost

Red Grandis Exclusive to Timbmet

- ✓ EUTR compliant, FSC® certified 100%, plantation grown hardwood
- ✓ Clear, uniform timber with outstanding workability
- ✓ Easily stained or painted
- ✓ Versatile and easy to machine
- ✓ TRADA and BRE tested for durability, flexibility and structural strength
- ✓ Continuity of Supply

Grandis Oak Stain Exclusive to Teknos

- ✓ Outstanding results – Oak appearance
- ✓ Protects against weathering, UV degradation, mould and fungal attack
- ✓ Fully water-based - reduces harmful emissions and disposal issues
- ✓ Rapid application and fast drying minimises work and storage times
- ✓ Easily maintained for lifetime performance

All the benefits of FSC certified 100% Red Grandis with the look and finish of Oak

TIMBMET
Everything wood should be

TEKNOS
Paint with Pride

The Timbmet Teknos partnership now offers Grandis Oak: the perfect Teknos protective stain system for Timbmet's exclusive FSC certified 100% Red Grandis.

Combining the outstanding workability and durability of Red Grandis with Teknos' aesthetic and protective Oak stain. A great Oak look available at a fraction of the cost.

Why Red Grandis?

Durable and Fungi Resistant

Independently tested in the UK by TRADA technology achieving Durability Class 2-3 – durable to moderately durable

Structurally tested

BRE tests prove D35 structural properties and C36 density

Environmentally Sourced

Responsibly sourced plantation grown FSC certified 100% timber

All Purpose

Suitable for high end internal and external application including mouldings, window and door frames, furniture and cabinets

Available as TEC®

(Timbmet Engineered Components)

TEC provides dimensional stability, reduced waste and costs, and a flawless finish. Available in both finger jointed and clear faced production.

Why Grandis Oak from Teknos?

- Industry leading standards for durability and performance
- Independent testing by BRE show the Teknos system outperforms traditional approaches by inhibiting rot, mould and moisture ingress
- Provides extended protection against weathering, UV degradation and fungal attack
- Fully water based system significantly reduces the harmful emissions and disposal issues associated with many conventional solvent based preservatives
- Rapid application time combined with fast drying to minimise work and storage times
- Propriety technology minimises micro-foaming in the final paint film, extending coating durability
- Simple maintenance keeps joinery performing and looking good throughout its service life

Responsible Business

Timbmet and Teknos are committed to environmental, sustainable and responsible business solutions.

FSC certified 100% Red Grandis is responsibly sourced from a sustainable plantation in Uruguay. Its certification reflects its proper use of forestry resources and the implementation of specific regulations ensuring the plantations are well managed with consideration for people, wildlife and the environment.

All Teknos factories have quality and environmental management systems, certified in accordance with ISO 9001 and ISO 14001. Joinery coatings are water based, with VOC levels significantly below current and proposed legislative levels, and free of all heavy metal additives.

Timbmet are in full compliance with the new EUTR legislation, having already operated in this way for several years.

 The **Wood Window** Alliance

What our customers say...

David Salisbury Conservatories

David Salisbury Conservatories manufacture some of the finest bespoke conservatories and orangeries in the UK.

They believe the properties of Red Grandis speak for themselves. *"It is a high quality, knot free, uniform timber, and wood stains can be applied to achieve a specific shade."*

"It's easy to machine and shape and because all lengths are identical there is less waste and reduced production time, as well as a much better finish overall - great for us and great for our customers."

Brookeswood Architectural

Mike and Fran Bryant, who have recently completed a self build in Hertfordshire, explain how delighted they are with their new Red Grandis windows and doors manufactured by Brookeswood Architectural. Originally they had intended to install solid Oak windows and doors in a natural Oak finish, but their plans were halted by the conservation officer, who insisted that all the exterior frames be painted in a dark opaque finish.

However, Brookeswood Architectural were quick to offer Red Grandis as an ideal solution. Fran Bryant said:

"Not only did this new option allow us to meet the conservation officer's requirements for the external finish, but at the same time thanks to Teknos natural oak stain developed for Red Grandis, we were able to achieve the Oak finish for the interiors that we had originally intended."

"To top it all, we made a significant saving using Red Grandis instead of Oak."
