

Barclaycard British Summer Time

Wisa® Space Plywood - lightweight and dimensionally stable

Project Brief

To design and build sets for the inaugural Barclaycard British Summer Time that took place in Hyde Park, London in July 2013.

Client

Spacial Installations

Product Solution

Wisa® Spruce Plywood

The Project

Spacial Installations were tasked with creating 5 life size pre-fabricated buildings with intricate, realist facades in the theme of Cuban bars.

The Challenge

Each building had to be delivered to site and operate as a real bar or restaurant throughout the event. In addition they needed to be flexible enough to store over winter and durable enough to be reused for up to 5 years.

Timbmet Plywood and Spacial Installations

The Timbmet Solution

Spacial Installations decided to use storage containers as the core of the buildings. This provided both a strong framework and a ready-made interior space, and made them relatively easy to transport. Spacial's in-house design team set to work designing the facades which would be constructed using Plywood panels.

Wisa® Spruce Plywood was selected for its lightweight and dimensional stability – it machines well in the workshop and creates less dust and chemicals than other Far Eastern panels.

Timbmet's Wisa® Spruce Plywood is ideal for structural and load bearing applications, it is PEFC certified and held in stock in a range of thicknesses from 9-24mm. The sheets were then covered in a specially made flexible render and painted to give the finished look.

Luke Carroll co-founder of Spacial Installations also sights Timbmet's consistent quality and reliability "We use Timbmet because they can guarantee the quality we need – clean, flat, square boards - and they can be relied upon to deliver the sizes and quantity we need when we need it – their prices are good and they can deliver as and when we need the stock."

The results speak for themselves – and you can see these amazing Cuban creations again this summer in Hyde Park – and next year, and the next, and the next!

We use Timbmet because they can guarantee the quality we need – clean, flat, square boards - and they can be relied upon to deliver the sizes and quantity we need when we need it. //
