Greenlam AFX Collection

Nothing to see here!

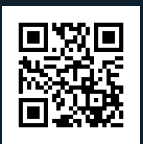

No finger prints, no sheen, no trace.

AFX is the next generation of premium surface materials for frontal and decorative application. Ultra-matt, zero sheen, soft and velvety to the touch.

The surface has been engineered to be anti-finger print, non-porous, hydro-repellant, scratch resistant and self healing; ensuring the only impression that's left is one of astonishment!

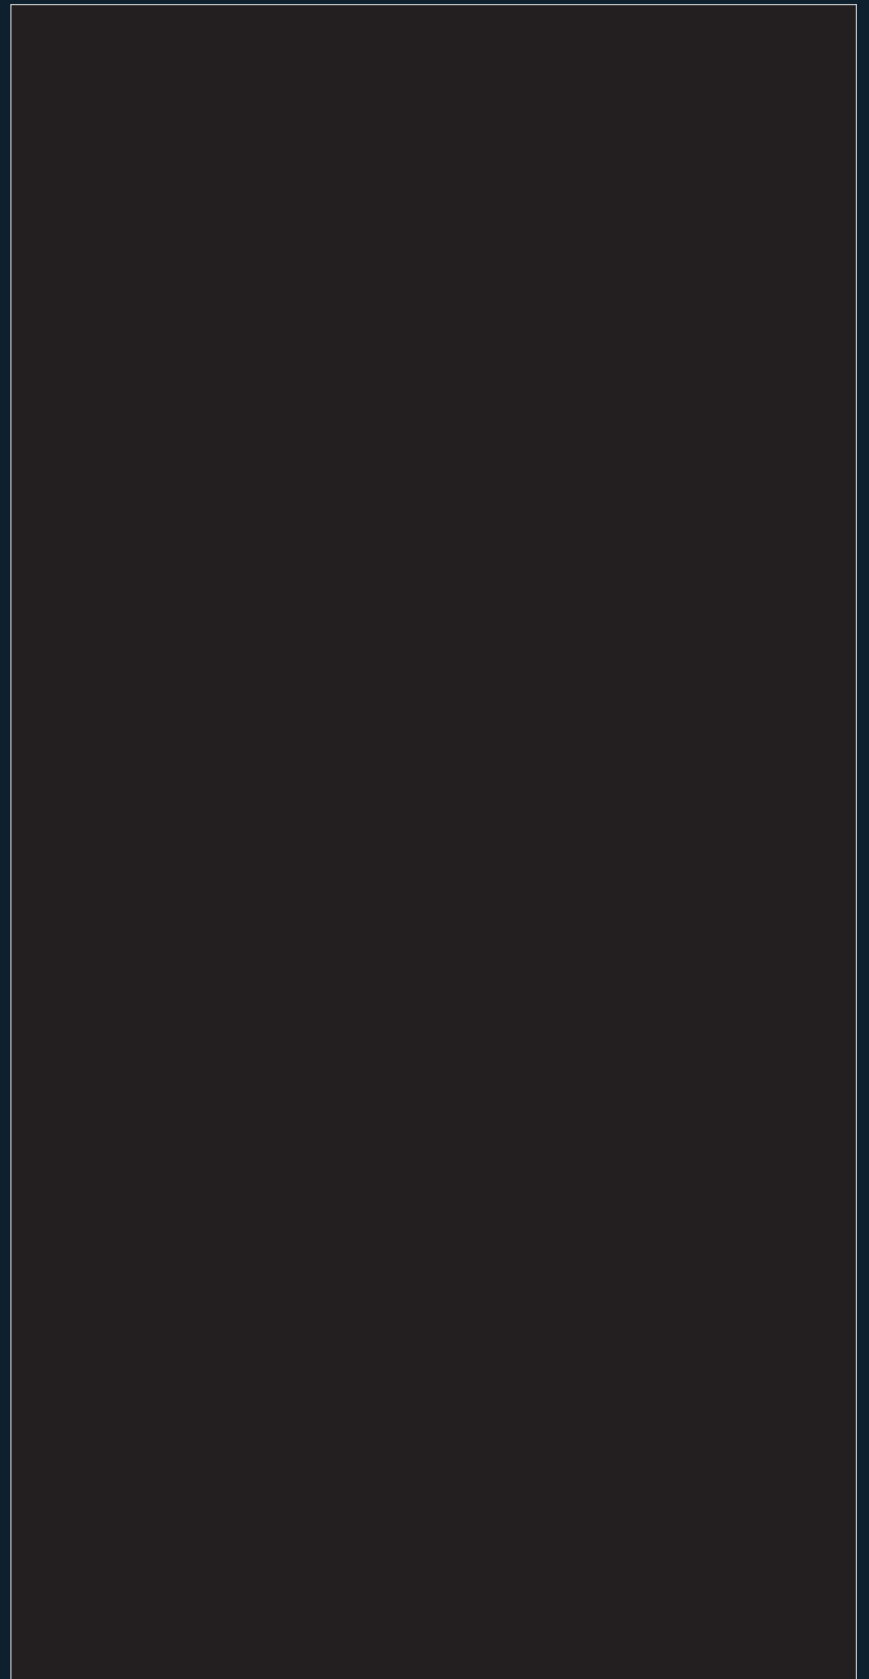

Don't take our word for it, take a coin and scour the sample. Then simply rub the surface with the friction from your finger, even better preferably with a melamine sponge.

Nothing to see, see!

Scan to watch how we
put AFX to the test.
