The Timber	The colour can vary to almost white to light pink or dark red, the sapwood does not vary significantly from the heartwood and this should be taken into account when processing, depending on end use sapwood exclusion is important. Plantation stock is generally straight grained and the texture medium to fine.
Colour	Light Pink to Dark Red
Density	600kg/m ³ when dried
Durability	Moderately Durable (Based on durability testing from a single plantation)
Movement	Medium to fine
Drying	Care needs to be taken to avoid checking and splitting
Texture	Medium to fine
Working Qualities	Works moderately well with some difficulty in planning due to occasional interlocked grain. Good nailing and screwing properties takes a good finish.
Uses	Exterior / Interior Joinery Mouldings
